MNGHA

**Results of consultation on the content you would like to add
to MNGHA website**

Expected effect

Knowing the preferred content on the website will have positive impacts on the quality of content provided and will help to better understand beneficiaries' needs and expectations, which will enable us to provide more efficient and effective care.

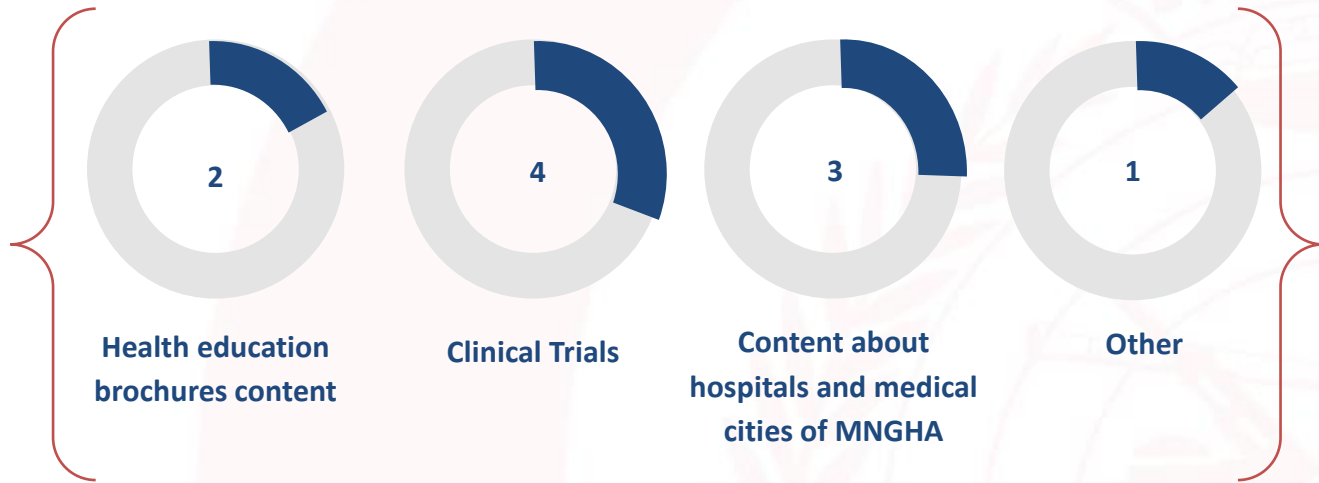

The Target

The consultation aims to know the preferred content on the website by sharing the opinions and advice of general beneficiaries from community members.

Results

What is the content you would like to add to the website?

Results and impact

MNGHA consider public opinions during decision-making processes regarding the content that beneficiaries wish to add.

Based on the results of the consultation, clinical trials content has been added in collaboration with MNGHA affiliate King Abdullah International Medical Research Center(KAIMRC).
