

ADVANCE Research Methodology Course

13,14,15 Jan, 2015

OBJECTIVES:

- * Comprehensive review of major study designs: definition, purpose, advantages, disadvantages, proposal writing, protocol design
- * Practical considerations
- * Understand different sampling techniques (probability and non-probability sampling)
- * Selecting primary and secondary outcomes
- * Quality of life assessment in medical research
- * Grant application
- * Ethical approval and good clinical practice
- * Practical points in design and conduct of medical research
- * Critical appraisal of scientific papers
- * Critical appraisal of published research

THE WORKSHOP CONTAINS FIVE PRACTICAL SESSIONS:

1. Writing a protocol for survey, case control study and clinical trial
2. Completion of grant application form
3. Discussion of practical ethical points
4. Designing consent forms
5. Critical appraisal for scientific papers representing different study designs

VENUE:

IABFH, Dammam
Classroom 2 - New Admin Building

FEE:

150 SR

SPEAKERS:

- DR. MUNIR ABU HELALAH
EPIDEMIOLOGIST, (KAIMRC-ER)
- DR. ABDUL SALAM
BIO- STATISTICIAN, (KAIMRC-ER)
