Results of consultation on Measuring the suitability of a website for use by elderly

Expected effect

Measuring the suitability of a website for use by elderly will have positive impacts and will help to better understand beneficiaries' needs and expectations, which will enable us to provide more efficient and effective care.

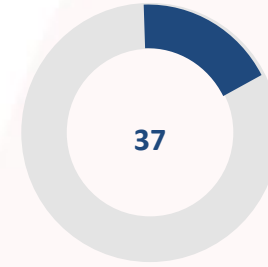

The Target

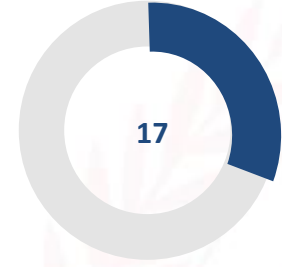

The consultation aims to Measure the suitability of a website for use by elderly by sharing the opinions and advice of general beneficiaries from community members.

Results

what is most prioritize feature to add to facilitate the use of MNGHA website for the elderly?

Results and impact

Based on the results of the proposed consultation to Measure the suitability of a website for use by elderly, a new accessibility tool has been added to the website. This enhancement aims to improve ease of access for individuals with disabilities and elderly, offering them a more comfortable, seamless, and inclusive user experience. This tool includes several key features, such a:

- **Sign Language**
- **Screen Reader**
- **Bigger Text**
- **Word Spacing**
- **Pause Animation**

Development is currently in progress to enhance virtual sign language, the virtual interpreter, and accessibility tools by adding features that comply with international accessibility standards.

Implementing Larger text features by clicking on “Bigger Text”
